

POD Form — Driver Manual

How to submit your **Proof of Delivery** on your phone, step by step. The on-screen text is shown in both English and Malay (for example **Driver · Pemandu**). This guide quotes the buttons and labels exactly as you see them.

The one rule: the form's top notice says — **Important · Penting: Upload the SIGNED invoice on the same delivery day. Late or missing = penalty.** Submit at **each stop**, not at the end of the day.

1. Open the form

1. Open the POD link on your phone (the page is titled **CLF Trading — POD Submission**).
2. At the top you will see **POD** and **Proof of Delivery · Bukti Penghantaran**. That confirms you are in the right form.
3. Read the orange notice at the top once. It reminds you to upload the **SIGNED** invoice the **same day**.
4. **Delivery Date · Tarikh Penghantaran** is filled in for you with today's date. Leave it as is unless told otherwise. (You cannot pick a future date.)

2. Enter your Staff ID (the Driver picker)

Under **Driver · Pemandu** there is a search box. The grey hint inside it reads **Staff ID (e.g. 448) atau nama**.

1. Tap the box.
2. Type your **Staff ID number** (example: **448**) **or** your name.
3. A list drops down. Each row shows the **Staff ID** in bold, then the name.
4. Tap your row. The box now shows your ID and name together, and a tag ✓ **[your name]** appears under it.

The next time you open the form on the same phone, your name may already be filled with a green tag ✓ **Remembered**. If it is correct, leave it. If it is the wrong person, just type and pick the right one.

If you ever see the hint change to ⚠ **Failed to load — refresh the page**, close and reopen the link (you need a connection so the staff list can load).

Second Driver (only if two of you share the lorry)

The next box is **Second Driver · Pemandu Kedua**, marked **If two drivers · optional**. Its hint reads **Staff ID atau nama (optional)**.

- If you drive **alone**: skip this box. Leave it empty.
- If **two drivers**: tap it, type the second person's Staff ID or name, and pick from the list (same as above).
- You **cannot** put the same person in both boxes. If you do, you will see: **Driver and Second Driver cannot be the same person**.

3. Select the lorry / vehicle number

1. Tap **Vehicle Number · Nombor Kenderaan**.
2. It opens a list that starts with **— Select vehicle · Pilih kenderaan —**.
3. Pick your plate number (for example **KER 9223** or **CDQ 9098**).
4. Choose carefully — this number decides which delivery list loads next.

4. The form loads today's deliveries for that lorry

As soon as the **date** and **vehicle** are both set, the form checks for today's job. You will briefly see **Checking delivery list... · Menyemak...**

- **If a shipment is found**: a list appears under the heading  **Today's Delivery List · Senarai Penghantaran**. A summary bar shows your plate and progress, like **3 / 8 delivered** (and ... **problem** if any failed), with a green progress bar.

- Each customer is a card showing the **customer name**, the **area**, the number of **invoice(s)**, and the invoice numbers.
- If the lorry has the same crew assigned, your **Driver** (and Second Driver) boxes may fill in automatically. Check they are correct.
- **If nothing is found:** you see **No delivery order for this lorry today** — it means the office has not issued the order yet. See [Section 7](#).

5. Confirm each delivery (photo, then save) — do it at EVERY stop

Submit at each stop, as you arrive. The save time is recorded as your arrival time, so the office sees an accurate record. **Do not** wait and do them all at the end of the day.

For each customer card in the list:

1. Get the customer to **sign** the invoice.
2. On that customer's card, tap  **Take photo · Ambil foto**. Your camera opens — take a clear photo of the **signed** invoice.
3. The photo appears as a small thumbnail on the card, with **1 photo ready ✓** (it counts up if you add more).
4. More than one invoice for this customer? Tap  **Add photo · Tambah** and snap the next one (up to 10).
5. Now tap the green ✓ **Save — Delivered · Dihantar** button.
6. You will see **Saving... · Menyimpan....** When done, the card turns green and shows ✓ **Delivered**, and the progress bar goes up.
7. Drive to the next stop and repeat.

The green ✓ **Save — Delivered** button only appears **after** you have taken at least one photo. No photo = nothing to save. If you tap save with no photo you will be told **Take a photo first · Sila ambil foto dulu**.

6. Mark a delivery as a problem (failed)

If you **cannot** complete a delivery, use the problem button instead of the photo.

1. On that customer's card, tap **Problem**.
2. A row of reason buttons appears. Tap the one that fits.

The available reasons are exactly:

Button	Use it when...
Shop closed	The shop is shut / no one there to receive.
Rejected	The customer refuses the goods.
Partial	Only part of the order could be delivered.
Reschedule	Delivery is moved to another day.

After you tap a reason, the card is marked **X Problem** (red). If saving fails you will see **Could not save · Gagal simpan** — try again.

7. What if there is no list?

Every delivery is issued by the office first. So if you pick your lorry and see  **No delivery order for this lorry today** instead of a list, it means one of these:

1. You picked the **wrong lorry** or the **wrong date** — check them at the top and fix.
2. The office has **not issued / imported** today's order yet — **call the office** to release it, then re-pick your lorry to refresh.

There is **no manual / walk-in submit**. Every delivery must go through the office-issued list, so the supervisor dashboard stays accurate. If a customer is **not on your list**, **contact the office to add it** — do not try to submit it any other way.

8. How you know a delivery saved

You do **not** get a separate screen for each save — the confirmation is right on the list:

- The customer's card turns **green ✓ Delivered** (or red **X Problem**).
- The progress bar moves up (for example **4 / 8 delivered**).
- That is your confirmation — drive to the next stop and repeat.

Quick check: the form sends in the background and cannot fully confirm by itself. To be safe, make sure your deliveries show up in the **supervisor dashboard** within a minute (or tell your supervisor). If a save looks stuck, re-pick your lorry to refresh the list.

If a save fails you may see **Could not save · Gagah simpan** — get a better signal and tap save again.

Tips

- **One stop, one submit.** Photo → Save at every customer, before you drive off. Accurate arrival times protect you.
- **Always get the signature first**, then photograph the invoice. An unsigned invoice is not valid.
- **Make the photo clear:** good light, whole invoice in frame, signature readable.
- **Many invoices for one customer?** Add them all to that customer (up to 10) before you tap save.
- **Check the date** shows today before you start.
- **Stay online.** You need a connection to load the staff list, load deliveries, and upload photos.
- **Watch the progress bar** (e.g. **5 / 8 delivered**) so you do not miss a stop.
- **After each save**, glance that your delivery reached the supervisor dashboard within 1 minute.

Common situations

Two drivers sharing one lorry

- The person doing the submitting picks themselves under **Driver · Pemandu**.
- Put the other person under **Second Driver · Pemandu Kedua**.

- Never put the same name in both — the form will block it (**Driver and Second Driver cannot be the same person.**).
- If the lorry's crew was pre-assigned, both boxes may fill automatically — just confirm they are right.

A shop is closed

- Do **not** skip it silently. On that customer's card tap **Problem**, then tap **Shop closed**.
- The card turns red with **X Problem** so the office knows why it was not delivered.
- If it will be tried another day, use **Reschedule** instead.

Partial delivery

- If only part of the order is delivered, tap **Problem** on that card, then tap **Partial**.
- Take a photo of the signed invoice for what you did hand over, so there is a record.
- Tell your supervisor what was short, so the rest can be arranged.
